

U.S. STANDARD & METRIC COPPER BAR

- **NO MINIMUM ORDERS ON FULL LENGTHS BARS**
- **CUSTOM CUTS ARE ALSO AVAILABLE**

Storm Power sells copper bars in custom cuts and 12ft. lengths - available in standard US and metric widths and thicknesses. Storm maintains a vast inventory of copper bar stock acquired in bulk purchases direct from the mill. Because of this, Storm is able to provide numerous dimensional profiles of copper bar in standard US and metric sizes - at wholesale prices.

Copper Bar Specifications

Manufactured to the American Society for Testing and Materials (ASTM) B187, B152 and B283-09 specification standards for copper and copper alloy.

Electrolytic-Tough-Pitch: C11000 copper is 99.90% Copper and .04% Oxygen, for hard-drawn sheet and plate offering high thermal and electrical conductivity with low ground resistance. Copper Alloy C11000 round rod has a minimum of 99.9% pure copper with excellent electrical conductivity and is easy to form and work. Ideal for use in electrical applications such as bus bars, connectors, and gaskets, C11000 copper rod cannot be heat treated and is not recommended for machining.
