

COPPER SHEET & PLATE

Full-size copper sheet and plate are only available in wholesale volumes. Talk to the experts at our ProStore to order.

Storm stocks an extensive inventory of sheet copper to ensure each order ships the next business day. Because of oversize handling and packaging, all orders must ship by common carrier which will be added to the overall price. This is the best way to make sure copper sheet arrives flat and in excellent condition.

The standard length and width of Storm Power's copper sheet metal is 96" x 36"

Copper Sheet Specifications:

Storm's copper sheeting is manufactured to the ASTM (American Society for Testing and Materials) B 187, B 152 and B 283-09 specification standards for copper and copper alloy: C 11000 copper is 99.90% Copper and .04% Oxygen, for hard drawn sheet and plate offering high thermal and electrical conductivity with low ground resistance.

Note: Brown and Sharpe is the standard used to measure the copper sheet gauge.

STANDARD 8' x 3' (96" x 36") Copper Sheets (& Plate) Are Available These Gauges (Thickness):

• In stock with same day shipping on orders before 2:00 PM EST

Copper Sheet

24 Gauge - .020" Thick
20 Gauge - .032" Thick
